SMART SURVEILLANCE SOLUTION PROSONIC

for

SECURITY

&

BUSINESS INTELLIGENCE

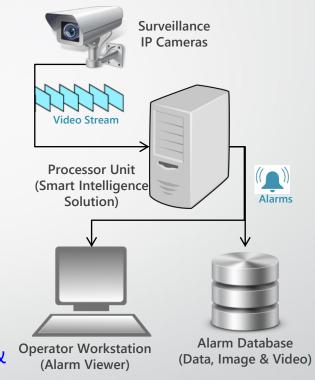

HOW INTELLIGENCE WORK?

Video Solution = Visible Intelligence Computerized Processing & Analysis of Video Stream

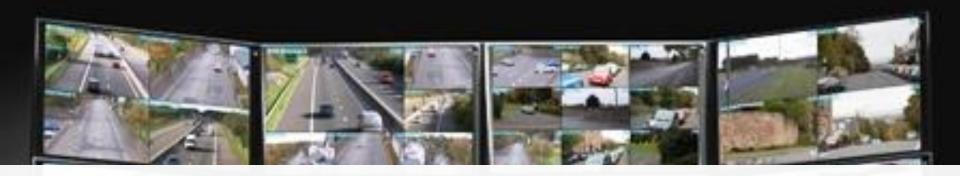

Software > Learns the Scene, Detects Object & Tracks it **User**> Configures Rules with Virtual Line & Area, Count, Time

Rule Violations > considered as security breach Statistics > Data on count, time/duration as decision intelligence

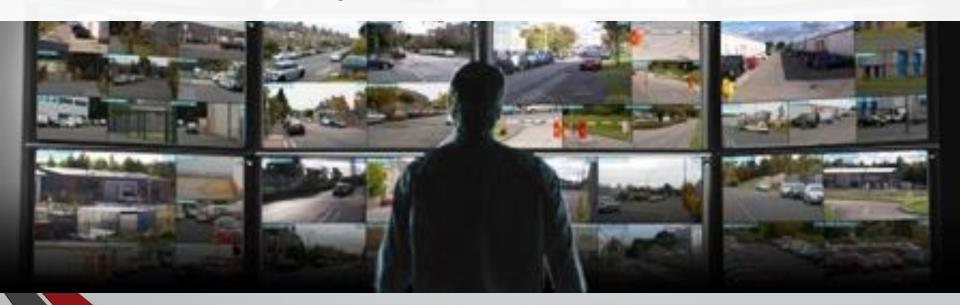

Input > Video received from IP Cameras
Output > Real-time Alerts & Reports sent to Database &
Client

As per a study done on the effectiveness of manual monitoring, the average human attention span is only around 20 minutes!

In **City Surveillance** scenario: **Too many** cameras / video screens. **Too few** people to monitor.

Important events and potential security threats might be overlooked!

WHY INTELLIGENCE?

VIDEO
INTELLIGENCE
the BRAIN of your
Surveillance System

IP Cameras are the Eyes of your System Smart Intelligence Solution makes it intelligent

Paradigm Shift: Evidence Analysis is Passé Proactive System: Prevention is the buzzword

Automation in Security Monitoring Real time alerts through Analytics

Effectiveness & Efficiency
Works 24x7, saves manpower & cost

Decision Intelligence! not just monitoring. Footfall | Occupancy | Profiling, and more...

WHY PROSONIC?

SPECIALIST

PROVEN

OPEN PLATFORM

COMPREHENSIVE

FEATURE RICH

FLEXIBLE OPTIONS

MORE CHANNELS

EASE OF USE

in Smart Intelligence Solution with focus on **Accuracy** and **Reliability**

Installations **world-wide** across various industries / verticals

Solution **integrates** Tightly with many VMS software

Solution with **Advanced Algorithms** and **High Level Scene Analysis**

with 40 plus Basic & Advanced Smart Intelligence Solution features

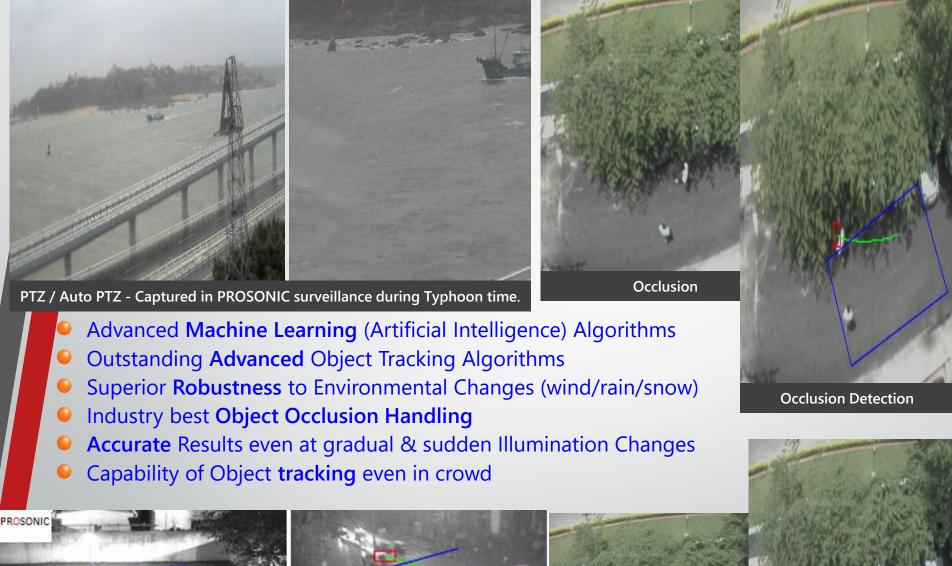

for Analytics - **Edge / Server** based (can also be installed in same machine)

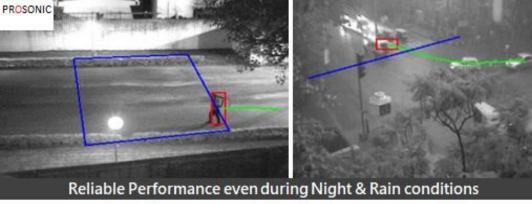

per Server, reducing Hardware Cost, increasing Efficiency.

Intuitive GUI, Easy to Install / Configure, High quality Support

When it comes to Reliability & Accuracy, you choose a SPECIALIST.

APPLICATIONS

City Surveillan ce

Unauthorized Crossing of Railway Lines

Boundary Surveillance of Critical Infrastructure

Suspicious Object & Behaviour Detection
Unauthorized Crowding / Overcrowding
Black Listed Person / Suspect identification

Effective traffic control at intersections

Detection of illegal traffic behaviour
Toll evasion detection at toll booths
Detection of unauthorized parking
Available parking slot detection

Building Surveillan ce

Monitoring Entry at Restricted Spaces

Access Control / Lobby Management
Abnormal Behaviour & Unidentified Objects
Early Warning through Video Smoke Detection
Monitoring Important Monuments for Vandals

Foot Fall Statistics & Queue

Monitoring

Reduce Shrinkage by Pilferage Detection

Counting beverages served over the counter

Viewership & Engagement Analysis

Profiling by demographic data
(age, gender)

Business Intelligen ce

SECTORS WE SERVE

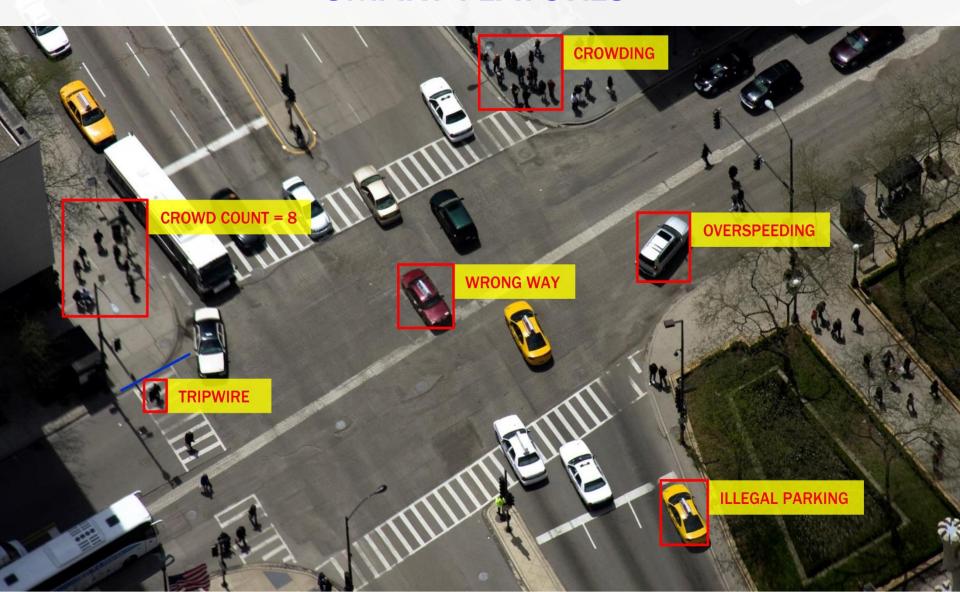

DETAILS ON INDIVIDUAL SMART FEATURES

FEATURES - AT A GLANCE

BASIC SECURITY	ADVANCED AUTO PTZ	ENHANCED MONITORING	ENHANCED MASKING
Zone Crossing / Trespass	Auto PTZ & Smart Auto PTZ	Video Stabilization	Face Masking
Line Crossing / Tripwire	PTZ Handoff	Video Stitching	Object Masking
Camera Tampering	PTZ Pre-set Position Analytics	Multi Camera Tracking	ONVIF Streaming
SUSPICIOUS OBJECT	SUSPICIOUS ACTION	SMOKE & FIRE SAFETY	ADVANCED SAFETY-PERSON
Left Object Detection	Loitering Detection	Video Smoke Detection	Slip & Fall Detection
Missing Object Detection	Tailgating Detection	Video Fire Detection	Gesture Recognition
CROWD MANAGEMENT	TRAFFIC MANAGEMENT	VEHICLE & PARKING MGMT	COUNTING APPLICATIONS
Crowding Detection	Speeding Detection	Illegal Parking	People Counting
Crowd Counting	Wrong Way Detection	Vehicle Counting	Queue Management
Crowd Flow Analysis	Congestion Detection	Parking Availability	Cup Counting
FACE DETECTION	FACE RECOGNITION	FACE ANALYTICS	VEHICLE LPR/ANPR
Face Detection	Face Recognition	Count, Presence, Frequency	License Plate Detection
Face Capture	Face Verification	Age Group & Gender Detection	License Plate Recognition
PLUS: Reporting & Analysis, Heat Map, Motion Map, Flow Map, Video Summary, Comparison Reports			

INTRUSION DETECTION

Features: Tripwire, Trespass, Camera Tampering, Auto PTZ Features
Works for all weather conditions, day **and** night
Auto zoom to get closer snapshot of the intruder

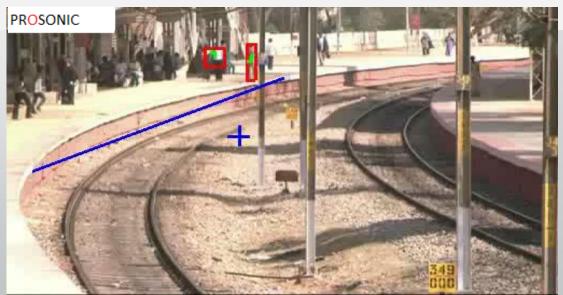

Usage: Intruder detection on fenced areas, critical infra, restricted zone monitoring

Tripwire: Detection of Person or Vehicle crossing a virtual line.

Trespass: Detection of Person or Vehicle entering a virtual area.

Camera Tampering: Detects camera focus change / obstruction / video cable cut.

INTRUSION DETECTION

Continuous Auto PTZ: Tracks object (Single or Multiple) using PTZ camera.

Smart Auto PTZ: Automatic one-step PTZ to capture closer view of the violator.

PTZ Handoff: Violation detected on Fixed camera triggers PTZ camera to its view.

PTZ Preset Analytics: Analytics on each pre-set position of a patrolling PTZ camera.

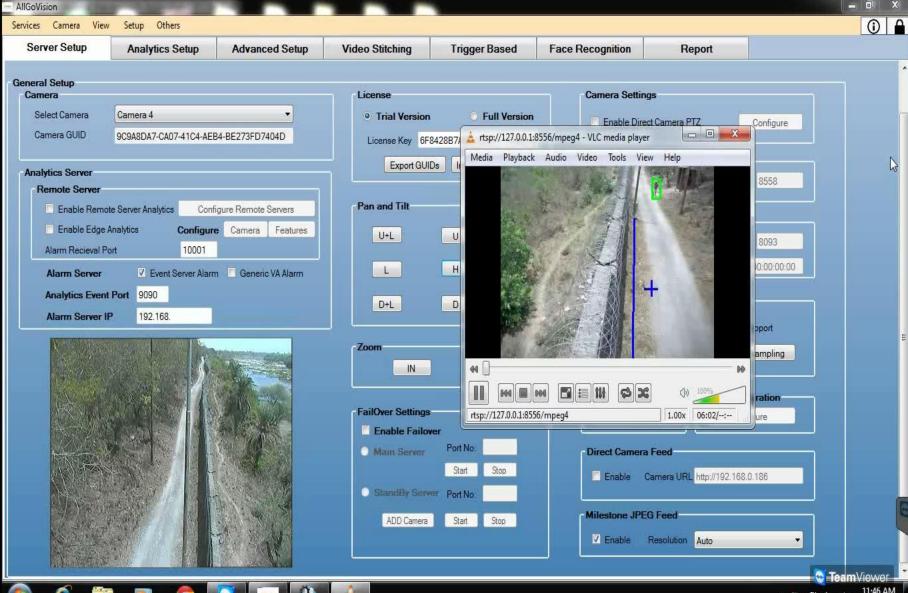

Fixed Camera

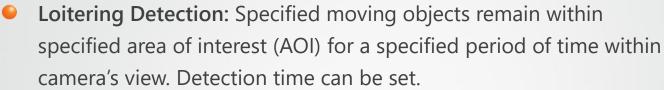

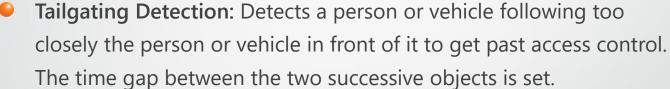

PTZ Camera

SUSPICIOUS INCIDENCES

- Left Object Detection: When an object is left in the scene for more than predefined time, an alarm will be sent. Used in Threat detection due to baggage left unattended in waiting rooms, ticket counters.
- Missing Object Detection: When an object is moved out of the outlined area for more than 10-15 seconds, Missing Object Alarm would be generated. Applications: Museums, Critical Asset Protection

CROWD MANAGEMENT

- Crowd Detection: When in a specified area the number of people exceeds a threshold.
 It can also detect sudden crowd surge.
- Crowd Counting: The counting gives approximate count of the crowd in an area.
 Gives crowd information either in terms of no. of people or percentage of area occupied.
- Crowd Movement Detection: This can detect movement of the crowd in a wrong direction. Counter flow detection can alert personnel and help in preventing mishaps.

VEHICLE COUNTING FEATURES

Vehicle Counting

Vehicle Counting counts the vehicles crossing a virtual line in a specific lane.

Integrated with advanced Auto Report E-mailer for Text, Graphical Reports.

Vehicle COLOUR based search is possible for post-accident investigations.

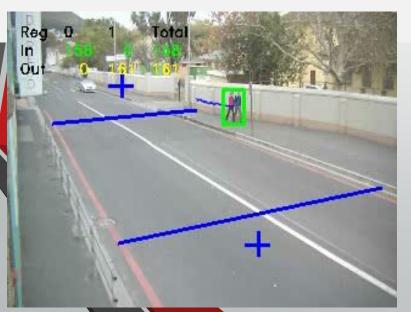

Vehicle Counting based Applications:

Vehicle Queue Management provides insights on waiting time mgmt.

Vehicle Congestion Detection alerts for congestion at Traffic Intersections

Parking Management feature provides parking availability in parking lots

Vehicle Classification differentiates between types of vehicles (Car, Truck etc.)

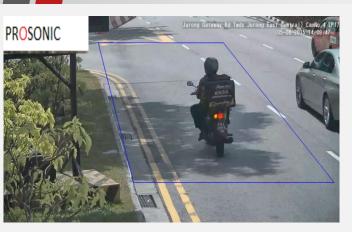

TRAFFIC MANAGEMENT

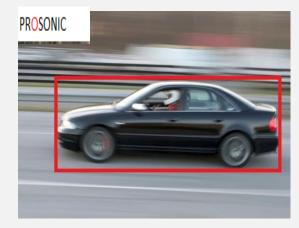

Illegal Parking: Raise alarm in case vehicle is parked in no parking zone

Speeding Detection: Identifies in case vehicle exceeds the required speed limits. Used for Airport pathways where there are speed limits to be maintained.

Wrong way detection: Detects in case vehicle is moving in opposite direction. Like if vehicle in entering through exit gate, alarm will be raised

Applications

- Traffic Monitoring in City Road Sides & Traffic Junctions
- Traffic Surveillance in Highways
- Vehicle Management and Violation Detection in Public Place Pathways.

LPD & LPR/ANPR

LPD: Detects the vehicle license plate in the camera view, captures the license plate image. LPR/ANPR: Recognizes the license plate by identifying license number from detected plate.

Application Areas

Parking Management: Ingress with no Egress

Traffic Monitoring: Red light violation or any other traffic rule violation **Law Enforcement:** Stolen cars can be detected and Place of registration can be tracked through traffic surveillance system in the city/highway.

Task Automation: Trigger operations such as access control **Automatic Toll Management:** Automatic charging for recognized cars

Camera Installation Scenario

PROSONIC

*Good quality IP cam, high shutter speed. Full HD, 120 DB WDR, 30 fps Frame Rate, Night IR illuminator

SMOKE & FIRE DETECTION

Rapid detection (in 5-10 seconds) of smoke even when it is formed in 10-15% of the view. Detects smoke with or without fire at both indoor and outdoor environment.

Usage: Early warning for Smoke & Fire at Server Rooms, Warehouses, Critical Resources

ENHANCED MONITORING

Video Stitching

Overlapped video feeds are stitched to make one seamless video in real time.

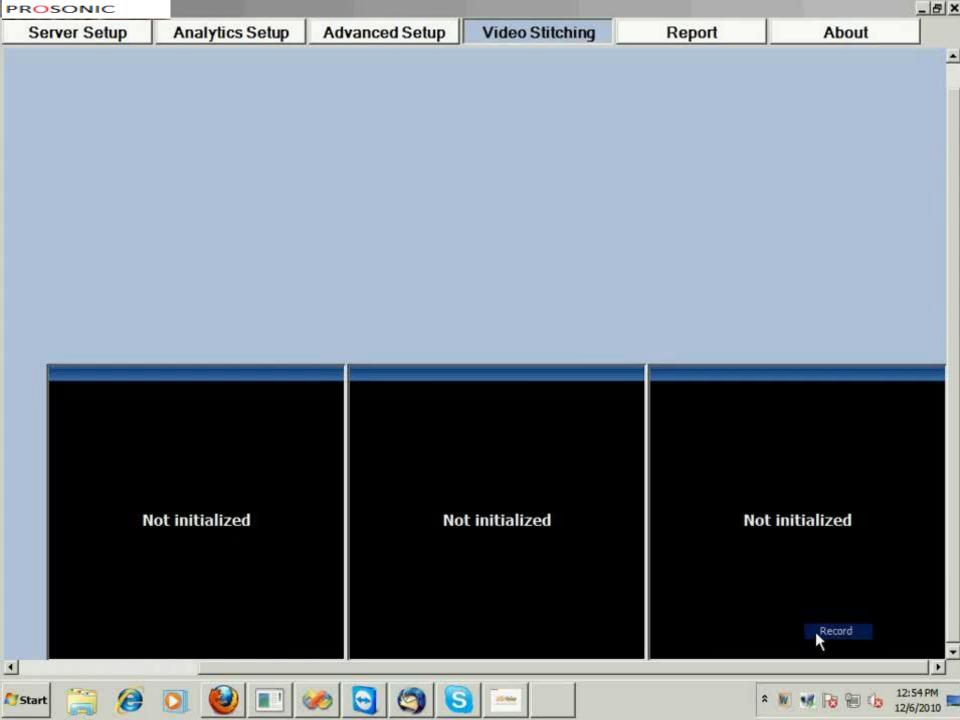

Object tracking supported on Stitched Video, sent as ONVIF camera to VMS.

Video Stabilization

Outputs stabilized video from shaking video inputs usually due to wind

FACE CAPTURE & RECOGNITION

Face Capture: Detects face in the camera FOV, captures it and stores it

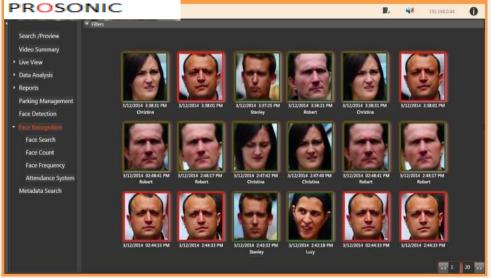

Face Recognition: Matches Face detected with the faces in the database and sends alarm.

Alarms: Option to send Alarms (Face Matching/non Matching) to VMS or Alarm Center

Applications:

- Detection and Capture of Human Faces (for record keeping) appearing in restricted areas
- Black List Alarm Identification of miscreants appearing in the surveillance cameras
- Face Forensic Search option for detecting closest matches for suspect images

FACE RECOGNITION IN CROWD

FACE COUNTING & ANALYSIS

Face Counting: Counts the number of faces in the camera view and over a time period

Face Presence: Detects for how much time any face was in the view

Face Frequency: Detects how frequently a recognized face appeared in the camera

Age Group & Gender Detection: Detects gender & approx. age group of the subject face

Applications:

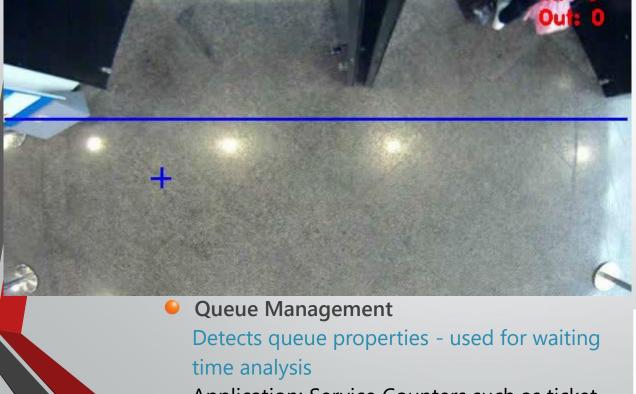

- Used for Digital Signage, Ads in Public Places
- Viewership / Audience Measurement (Face Count
- Viewership / Audience Engagement (Face Presence)
- Frequency of Visit by VIP Guests etc. (Face Frequency)
- Profiling of Visitors to Public Amenities based on demographic analysis (age group & gender)

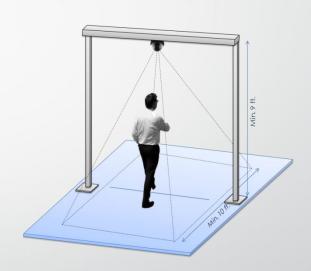

PEOPLE COUNTING FEATURES

People Counting & Reporting

2012/4/15 "U"E 01:3386

Count the people traversing a certain passage (both IN & OUT directions, Accuracy: 90-98% Application is integrated with advanced Auto Report E-mailer for Text, Graphical Reports.

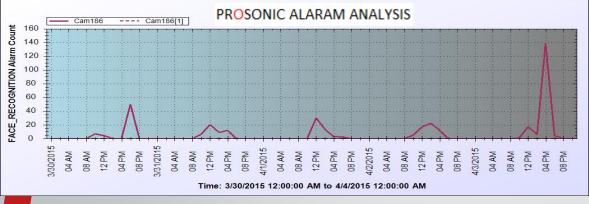

Application: Service Counters such as ticket

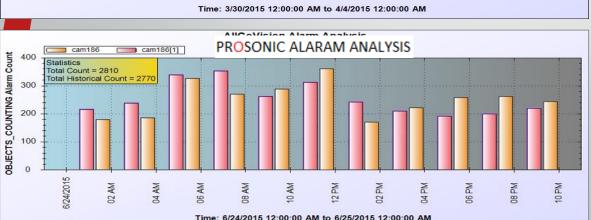

counters

Provides: Ingress (in flow), Egress (out flow), Waiting time

REPORTING & ANALYSIS

- Report of counting with different time duration, interval and plot options.
- Export of plot in JPEG and report CSV format
- Zonal Report with multiple cameras added in each zone
- Scheduling of Reports, Auto Report E-mailer, FTP upload of Reports, Comparison Reports
- Heat Map, Motion Map & Flow Maps

MULTI CAMERA TRACKING

Multi Camera Tracking

- By this feature, a person is tracked in adjacent cameras in the multi camera network.
- Uses object properties to track any person in adjacent cameras.
- Persons to have similar profiles (Front/Side) at similar distance in multiple cameras.

Application: Saves time, makes the task easy for operators of surveillance monitoring who would otherwise manually track suspects from camera to camera.

Multi Camera Tracking

PRIVACY MASKING

Privacy Masking

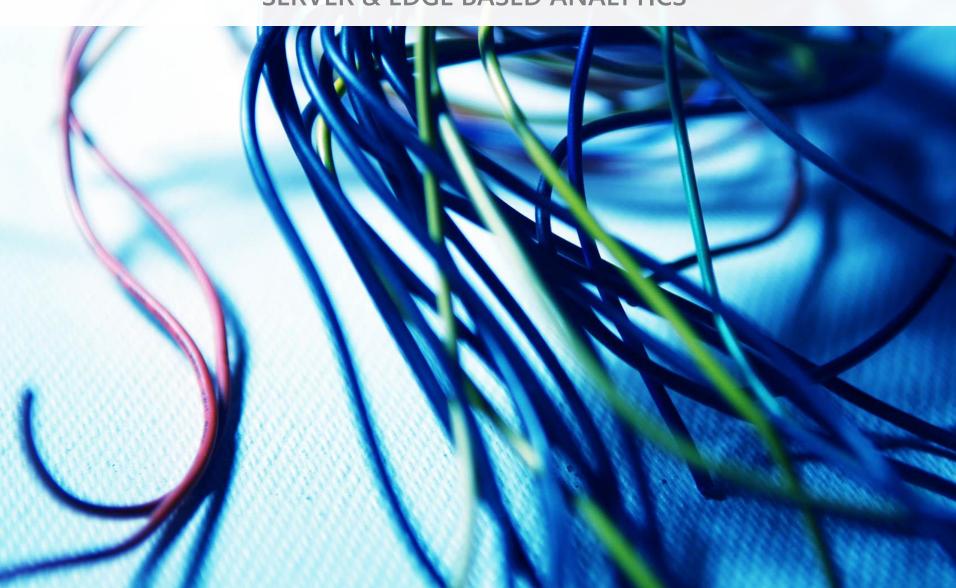

- Face and Skin area is masked to protect the identity of the persons appearing in the camera view of surveillance system
- While unmasked video is recorded & stored, masked video is viewed by operators during surveillance monitoring.

Application: Privacy for people under surveillance, unmasked video for storage, masked video for monitoring & evidence export.

SYSTEM ARCHITECTURE

SERVER & EDGE BASED ANALYTICS

FLEXIBILITY - SERVER / EDGE

SERVER ANALYTICS

Flexibility in Installation

In the same machine with VMS / on a separate machine

Takes video feed from VMS or directly from cameras

Supports ONVIF for video stream exchange with camera /VMS

Supports several leading VMS providers

Sends alarms to VMS Viewer (VMS Client) or Alarm Center

Runs as Windows service, supports up to 100 channels/server

Supports Failover

EDGE ANALYTICS

Available on Axis Camera

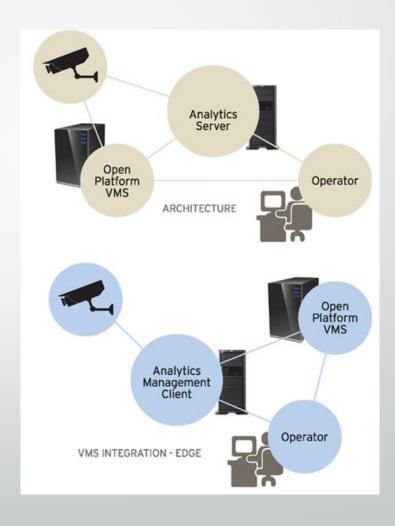

Can send alarms to VMS Viewer (VMS Client)

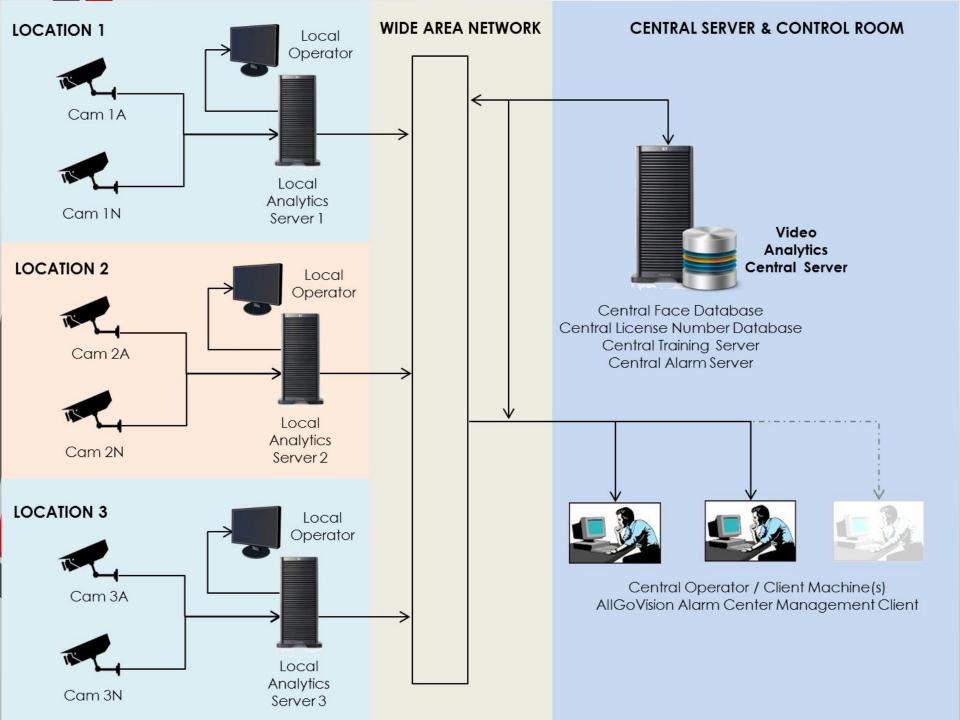

Runs as Windows service, supports up to 200 channels/server

Saves extra hardware cost

Intrusion Detection, Suspicious Incidences, Counting Features

Supports several features simultaneously

LIST OF OTHER INTEGRATIONS

- Milestone Xprotect VMS
- Genetec Security Center
- IndigoVision Control Center
- Exacqvision VMS
- PROSONIC VMS & 3S
- Cisco VSM
- Digital Watchdog Spectrum
- Verint Nextiva
- Axis Camera Station
- Axis edge

CASES – SMART CITY / SURV.

SMART City - India

- Use case: Building Surveillance for Safe & Smart City
- Solution: Prosonic Smart Intelligence Solution + Alarm Center
- Features: Perimeter Protection and Indoor Security features

Video Intelligence for Smart Villages

- Solution: Prosonic Smart Intelligence Solution
- Features: Security Features, Loitering, Wrong-way Detection

Smart Solution Through Mobile Vans

- Solution: Prosonic Smart Intelligence Solution
- Features: Riot Detection, Crowd Detection

CASES - CITY SURVEILLANCE

Surveillance Design For GANESH VISARJAN

- Use case: Crowd Management
- Solution: Prosonic Smart Intelligence Solution + Alarm Centre
- Features: Crowd Counting, Crowding Alert, Crowd Flow Detection

City Surveillance

- Solution: Prosonic Smart Intelligence Solution
- Application: City Surveillance
- Features: Face Recognition

City Surveillance

- Solution: Prosonic Smart Intelligence Solution
- Application: City Surveillance
- Features: Security Features

CASES-TRAFFIC SURVEILLANCE

Traffic Surveillance

- Design: Illegal Parking Detection
- Solution: Prosonic + Milestone
- Features: Illegal Parking, Face Masking

Bridges

- Solution: Prosonic + Alarm Center
- Features: Illegal Parking Detection

Traffic Surveillance

- Solution: Prosonic
- Features: Traffic Surveillance, Left Object Detection

CASES- SAFETY & SECURITY

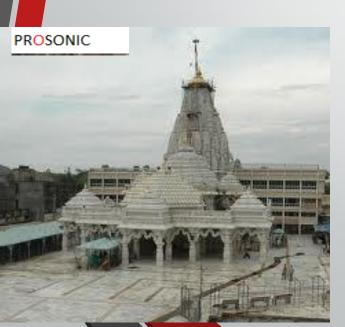

Trains International Airport

Solution: Prosonic + VMS

Features: Detecting unattended object / unauthorized people

for preventing Human trafficking and smuggling

Use case: >99% detection, < 1% false positives</p>

Places of Pilgrimage / Holy Temples

Solution: Prosonic + VMS + IP Cameras

• Features: VCA features to avoid mishaps, raise alerts for events such as intrusion, suspicious behaviour, overcrowding.

CASES- PERIMETER SECRUTIY

Banking Solutions

- Design: Smart Intelligence for Perimeter Security
 Solution: Prosonic Smart Intelligence Solution
- Features: Intrusion Detection features

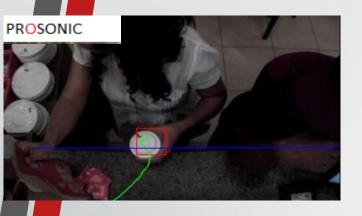

TATA Power

- Design: Smart Intelligence for Perimeter Security
 Solution: Prosonic Smart Intelligence Solution
- Features: Intrusion & Suspicious Incidence Detection

CASES- BUSINESS INTELLIGENCE

Case Study - Cup Counting

- Cup counting software for Café Coffee Day
- Use case: Beverage counting for pilferage reduction
- Very challenging use case with unrestricted movement of cups
- IP Camera, Milestone X-Protect VMS and Prosonic VCA
- Achieved 95% + accuracy

Footfall Statistics at Forum Malls

- Solution: Prosonic + Alarm Centre
- Features: People Counting & Reporting

Visitor Statistics & Conversion, Retail Stores

- Solution: Prosonic + Alarm Center
- Features: People Counting, Reporting in LDM format for POS

DESIGN CASES

Banking Projects

Design: Business Intelligence,

Solution: Prosonic + Alarm Center

Features: Tripwire/Trespass, Loitering, Counting,

Face capture, Smoke detection at server rooms

METRO PROJECTS

Design: Prevent fire hazard, Sterile zone security

Solution: Prosonic + Alarm Center

Features: Tripwire/Trespass, Loitering, Counting,

Face capture, Smoke detection at server

CASES- EDUCATION

University

Use case: Server room Smoke & Fire Detection

Solution: Prosonic + VMS

Features: Smoke detection and Intrusion detection

University

Solution: Prosonic + VMS + IP Cameras

• Features: Intrusion Detection Features

Transportation Delhi Airport • Hong Kong Int. Airport • Hanoi Airport • Indian Railways • Keretapi Tanah Melayu Berhad • CONCOR India

City / Traffic Surveillance

Singapore Traffic Surveillance • Qatar City Surveillance • Turkey Traffic Surveillance • Jakarta City Surveillance • Bandra

Baroda Highway

Worli Sea Link, Mumbai • Kumbh Mela - Nashik • Mobile Van Surveillance - Chandrapur • Lavasa Township • Pushkaralu •

Power, Oil & Gas

Bharat Oman Refineries • Indian PSUs (GAIL, HPCL, IOCL, ONGC, BHEL, NTPC) • Khazzan Oil & Gas - Oman • Tata Power

Critical Infrastructure

Baroda Museum • Macau Tower • Mysore Palace • Sabarmati Jail • Somnath Temple • Meenakshi Temple • Currency Press

Education

Changzhou University • Symbiosis International University • IITM – Pune, Noida

Retail

The Galleria Mall Jordan • Culture Kings – Australia • Abu Dhabi Mall • Mall, South Africa • Forum Mall, Hyderabad, • 7-Eleven Stores • Café Coffee Day • Sephora Retail, Kualalumpur • National Environment Agency, Food courts - Singapore

Indian Air Force • Abu Dhabi Police • Ministry of Interior, Abu Dhabi • Indira Gandhi Centre for Atomic Research • Indian

Navy • Customs Office, Vietnam

PLAN FOR GLOBAL PRESENCE

Footsteps in more than 30 countries globally....Before 2025

PROSONIC

corporate@prosonic.in

*50+ Basic and Advanced Video Analytics Features
